

CAPABILITY STATEMENT

TechGroup America is an EDWOSB and WOSB certified people resource company (staffing and consulting), specializing in Information Technology (IT) solutions. Our highly qualified people are readily available to deliver solutions to our customers anytime, anywhere. TechGroup America was founded with the goal of not only building a successful company but doing it better than the rest. TechGroup America is an information and technology company which offers IT and solution services. We provide services of high standards to multiple companies in different fields.

Offering and Services:

We provide specialized teams of people to provide IT solutions. Our solutions range from systems integration to software requirements, as well as development. Below is a sampling of the types of solutions our people have experience in providing:

1. Software Development

TGA focuses on delivering customized application software solutions in client/server platform and in web domain. Our customized services empower applications to evolve and reinvent processes enabling you to deliver reliable, stable, and faster results.

2. Cloud Migration & Modern Cloud Architecture

TGA is one of the prominent players in the field of Cloud computing, we offer effective solutions for Cloud support & maintenance to help our global clients with Cloud storage, Private, Public & Hybrid application development, among other things.

3. Robotic Process Automation

Robotic Process Automation (RPA) services enable enterprises to accelerate performance, deliver real value and improve ROI through the application of intelligent process automation.

4. Artificial Intelligence & Data Analytics

Artificial intelligence is crucial for enterprises that want to stay ahead of the competition. Artificial Intelligence (AI) and Machine Learning (ML) are arguably the next set of transformative technologies in the tech sector, in part because of their broad applicability across diverse applications.

5. DevOps

Software infrastructure, either cloud or local, needs monitoring, maintenance, support, and improvement with time. TGA DevOps engineers help in solving the issues on the resource's optimization, reassigning the load, and adjusting the scale. They also help with project creation, configuration and support of secure environments, remote configuration, and security recommendations.
